

Appendix A

The climate zones are determined by heating degree day (HDD) values as found in the Model National Building Code (2010). Specific locations, their HDD values and climate zone are shown below the map. If the location has an asterisks appended to it, the location has been assigned a colder zone to maintain market integrity.

Zone 3: ≥ 6000 HDDs

Zone 2: 3500 to <6000 HDDs

Zone 1: <3500 HDDs
